## DETAILED ACTION

This is a first office action on the merits of patent application S. N. 10/790,918.

### *Priority*

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3-10 and 12-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Dehrmann ('763).

Dehrmann discloses a bridging clutch (1) for a hydrodynamic torque converter (Fig. 1) comprising a first and second converter components (7, 2), first and second friction areas (11, 14), a friction lining carrier (10), first and second friction linings (15, 16, 17, 18), continuous openings (19), coincident arcuate recesses (21), and crest points.

***Allowable Subject Matter***

Claims 2 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Dehrmann et al. ('474), Waith et al. ('366), and Ackermann ('637) disclose other bridging clutches having openings.
